

Customer Panel Guide

WABA Panel 2026 — NodeJS Edition

Your everyday manual: connect WhatsApp, chat, contacts, campaigns,
automation, AI & sales — shown with real screenshots.

KKHS Media Private Limited

190A Krishna Kunj, Kalwar Road, Jaipur, Rajasthan 302012

Mob: 9782005500 | Email: info@kkhsmedia.com | GST: 08AAICK3853C1ZL

Welcome — Your Day-to-Day WhatsApp Workspace

This guide is for the **Client Panel** — the screen you (or your customer) use every day to connect WhatsApp, chat with customers, save contacts, send campaigns, build chatbots, book appointments, sell products, and more. Everything is shown with real screenshots so it is easy to follow.

IN SIMPLE WORDS The one-line idea

Connect your WhatsApp once, then manage all your chats, contacts and marketing from one clean dashboard — with automation and AI doing the repetitive work for you.

TIP Do these 3 things first

1) Connect a channel (WhatsApp) — Section 3. 2) Import your contacts — Section 5. 3) Create a message template — Section 6. After that you are ready to chat and run campaigns.

1. Logging in

Open your panel address and log in with your email & password. You land on the Dashboard. The left menu groups everything: Inbox, Contacts, Campaigns, Automation, Leads & Commerce, Channels, Settings and more.

2. Dashboard — Your Daily Overview

The dashboard is your morning briefing.

The screenshot shows the WabaPanel Dashboard. At the top, there's a header with the WabaPanel logo, a search bar, and several utility buttons: 'Install App', '₹2,000.00', 'English', 'Clear Cache', 'Demo User's ...', and a bell icon. Below the header, the dashboard is divided into several sections. On the left is a sidebar menu with options like Dashboard, Analytics, Inbox, Contacts, Pipeline Board, Campaigns, Save Money, Automation, Leads & Commerce, Channels, Settings, Subscription & Plans, Media Library, CTWA Ads, and API & Developers. The main content area starts with a 'Dashboard' header and a 'Welcome back, Demo User' message. Below this is a 'Today at a Glance' section with four cards: 'Today Sent' (0), 'Today Received' (0), 'Unread Messages' (0), and 'New Contacts (30d)' (0). Next is an 'Action Needed Today' section with four cards: 'Today's Appointments' (No appointments today), 'Due Reminders' (No pending reminders), 'AI Follow-ups Check leads' (Needs reply / gone quiet), and 'Active Chats' (0 resolved). Below this is a 'Messaging & Contacts' section with four cards: 'Total Contacts' (0), 'Messages Sent (30d)' (0), 'Delivered' (0), and 'Read' (0). At the bottom right, there's a 'Wallet' card showing a balance of ₹2000 and ₹0 spent (30d). A red banner at the top right of the dashboard indicates 'WhatsApp Disconnected'.

The Client Dashboard: today's activity, reminders, and key numbers.

- **Today at a Glance** — messages sent/received, unread chats, new contacts.
- **Action Needed Today** — appointments, due reminders, leads to follow up, active chats.
- **WhatsApp status** — top-right shows if WhatsApp is Connected or Disconnected.
- **Wallet** — your current balance and recent spend.

3. Channels — Connect WhatsApp (Start Here)

This is the most important step. Open **Channels** and connect WhatsApp. You can use the official WhatsApp Cloud API (recommended) or QR-based connection, depending on your plan.

Channel Configuration
WhatsApp, Facebook Messenger and Instagram DM — API configuration for all three channels in one place

WhatsApp Business
Not connected [Configure](#)

WhatsApp by QR
Connect a normal WhatsApp number by scanning a QR code (no API needed) [Connect](#)

Stay safe — read before connecting

- This uses WhatsApp Web (not the official API). It is against WhatsApp's Terms of Service and carries a **risk of your number being banned**. Use a secondary number, not your main personal/business number.
- Our safety engine protects you automatically: new numbers start with a small daily limit that grows over 2 weeks (number warm-up), messages are sent with human-like random delays and typing indicators.
- Only message people who know you or have contacted you first. Never send bulk promotions to unknown numbers — that is the fastest way to get banned.
- Avoid sending the same text repeatedly. Personalize messages and keep a healthy reply rate (if nobody replies, slow down).
- Keep your phone connected to the internet. If the number gets banned or logged out, the channel pauses automatically and you will see it here.
- For bulk campaigns, official templates and green-tick verification, use the official **WhatsApp Business API** channel above.

Facebook Messenger
Page messages go straight to your Facebook Inbox ☐ Enable

Facebook Page ID
e.g. 1234567890

Channels: connect WhatsApp, Telegram, Facebook, Instagram & Email.

- **WhatsApp** — connect via official Cloud API (enter your WABA / phone number ID) or scan a QR.
- **Telegram, Facebook Messenger, Instagram, Email** — connect other channels the same way.
- Once connected, all messages land in one shared Inbox (next section).

IMPORTANT Need WhatsApp API access?

For the official Cloud API you need a Meta / Facebook Business account and an approved WhatsApp number. We help you set this up — ping us on WhatsApp +91 70620 10000.

Conversations 0

Search interactions

All labels

All Unread Active Assigned Unassigned Resolved

No conversations

Welcome to WabaPanel by KKHS Media

Choose a conversation from the sidebar to begin chatting or send a new message

Inbox: all conversations in one place, with labels and filters.

- Left: all conversations, searchable, with filters (Unread, Active, Assigned, Resolved).
- Assign chats to team members, add labels/tags, and mark resolved.
- Send text, media, templates and quick replies; see delivery & read status.
- Use New Msg to start a fresh conversation.

5. Contacts, Segments, Tags & Fields

Your entire audience lives here. Import contacts, organise them, and target them precisely.

Contacts: your CRM — search, tag, segment and import.

- **Contacts** — add manually or import from CSV/Excel; view chat history & notes.
- **Tags** — label contacts (e.g. Lead, Customer, VIP).
- **Segments** — smart groups based on tags/fields for targeted campaigns.
- **Data Fields** — add your own custom fields (city, order value, etc.).

No tags created yet

Tags: colour-coded labels to organise contacts.

6. Message Templates

To message customers on the official WhatsApp API you use approved templates. Create them here, submit for Meta approval, and reuse them in chats and campaigns.

Templates: create and manage Meta-approved message templates.

TIP Template tips

Keep them clear and useful (order updates, reminders, offers). Add variables like {{name}} for personalisation.

7. Campaigns & Broadcasts

Reach many people at once. Pick a template, choose a contact segment, schedule the send, and track delivery & reads.

Product Catalogue

0 products

+ Add Product

No products yet

Add products to your catalogue to share via WhatsApp

+ Add Product

Product Catalog: sell products directly inside chat.

- **Catalog** — add products with images & prices; share them in chat.
- **Orders** — track orders placed by customers.
- **Forms** — collect lead/order details with in-chat forms.
- **Pipeline Board** — drag deals through stages (New → Won) like a CRM.

The screenshot shows the WabaPanel interface. The top header includes the WabaPanel logo, a search bar, an 'Install App' button, a balance of ₹2,000.00, a language dropdown set to English, a 'Clear Cache' button, and a user profile dropdown for 'Demo User's ...'. The left sidebar contains a search menu and a list of navigation items: Dashboard, Analytics, Inbox, Contacts, Pipeline Board, Campaigns, Save Money, Automation, Leads & Commerce, Channels, Settings, Subscription & Plans, Media Library, CTWA Ads, and API & Developers. The main content area is titled 'Orders' and features four summary cards: 'Total Orders' (0), 'Pending' (0), 'Delivered' (0), and 'Revenue' (₹0). Below these cards are tabs for 'All', 'Pending', 'Confirmed', 'Shipped', 'Delivered', and 'Cancelled'. A table with columns 'ORDER ID', 'CUSTOMER', 'ITEMS', 'TOTAL', 'STATUS', 'PAYMENT', and 'DATE' is shown, but it contains no data, displaying 'No data found'.

Orders: track what customers buy.
